BAVARIA

BAVARIA® Self Actuated Carbon Dioxide Fire Extinguishing Unit

Direct/Indirect high Pressure Operated

Type

BAVARIA FIRESEARCH-CO₂

Applications:

The BAVARIA FIRESEARCH CO₂ is the new innovation designed for protecting inaccessible areas and fighting fires enclosures as control panels, cable tray and machinery rooms.

Fire Fighting Solutions

When It Comes To Your Safety Only The Best Is Good Enough

BAVARIA® Self Actuated Carbon Dioxide Fire Extinguishing Unit

Direct/Indirect high Pressure Operated

Type: **BAVARIA FIRESEARCH- CO₂**

Theory:

- Specially designed for protecting inaccessible areas or enclosures such as: vehicles, control panels, and machinery rooms
- Bavaria firesearch is an automatic fire-seeking and fire fighting unit. It consists of one firesearch flexible polymer tubes pressurized at 8 bar and connected to a carbon dioxide fire extinguisher.
- Automatically actuated upon bursting of the tube at any point along its length due to temperature rise up-to 99°C (210.2°F).
- Drop of tube pressure in the direct high pressure firesearch system discharges the CO₂ gas directly from the burst hole in the tube at the closest point to the fire, which allows the fastest extinguishing time and minimum spread of the fire
- Drop of tube pressure in the indirect high pressure firesearch system discharges the CO₂ gas via piping network which ends with special nozzle that distribute the gas all over

Features:

- Ideal for any application where a potential fire risk is present within an enclosed or confined space by extinguishing fire at its very incipient stage with minimal damage.
- Firesearch automatic high pressure fire extinguishing system do not need any external source of energy or electric supply.
- Cost effective as no electrical installation or wiring is required and less amount of gas.
- Can be interfaced with an alarm device or system via pressure switch.

STOPS FIRES WHERE THEY START...

**Control Panels****Machine Rooms****Boats****Escalators**

.... IN SECONDS!

5 SECONDS
small fire begins

10 SECONDS
tubing ruptures,
releasing gas,
extinguishing fire

15 SECONDS
the fire is out

BAVARIA® Self Actuated Carbon Dioxide Fire Extinguishing Unit

Direct/Indirect high Pressure Operated

Type: **BAVARIA FIRESEARCH- CO₂**

Features:

- Suitable for fighting flammable liquids and electric fires
- Carbon dioxide is a clean agent that leaves no traces, thus ideal for fighting fires involving electronic and hi-tech equipment.
- Brass valve complete with overpressure safety valve, and pressure regulator
- High quality surface treatment and red polyester coating

The Company Certified according to Quality, Environment ISO 9001, ISO 14001 and BS-OHSAS 18001 Management Systems
Bavaria Laboratory Accredited According to the ISO/IEC 17025

Specifications:

System Type	Direct High Pressure System			Indirect High Pressure System	
Capacity	2 kg	6 kg	10 kg	25 kg	45 kg
Fire Classes	BE			BE	
Test Pressure	250 bar			250 bar	
Cylinder Bursting Pressure	Over 450 bar			Over 450 bar	
Operating Head	Brass valve with overpressure safety valve				
Discharge Fittings	Firesearch polymer flexible tube at various lengths			Piping network which ends with special nozzle	
Cylinder	Seamless steel cylinder				
Tube Bursting Temp. at 8 bar	99 °C (210.2 °F).				
Extinguishing Agent	CO ₂				
Paint Finish	Surface treatment and 100% polyester coating				
Gross Weight	8.3 kg	22.2 kg	36.0 kg	105.0 kg	135.0 kg

Warranty:

Period of Warranty	1 Year
Coverage of the Warranty	Against material failure and production defects
Method of Warranty Coverage	Limited to the replacement of the defected part or product after verification that the failure is covered by the scope of the warranty
Warranty Exclusions	Failures due to misuse, mishandling, or inspection or repair by an unauthorized dealer or entity
